ABOUT US

As young entrepreneur’s we decided to start something new with the old and strong family values. We started as importers and stockiest for abrasion resistance in year 2009. We used to import stock and sell the abrasion resistance and high tensile plates directly to cement plants, power plants, stone crushers, mines, road construction equipment manufacturers, yellow goods manufacturers, etc. Everyday we learned something new, new applications of the products and we kept on adding new products to our portfolio. As young entrepreneur’s we learned a lot from our suppliers on procedures of processing these plates in different forms and intigrated them in our daily working.

In 2013 we started with out sourcing of the sheet metal processing (CUTTING, BENDING, DRILLING, CSK, MILLING, ROLLING, BENDING, WELDING, BLASTING, PAINTING, ETC) then it was never a stop for us.

In 2017 we purchased our own machineries for processing these products and had strategic tie up with various vendors for bilateral business development.
